

# MANIFOLD SIGHT GLASS ASSEMBLY

FILE NAME : MANIFOLD\_SIGHT\_GLASS

SEA1774 has been added to the sight glass assembly, so that the sight glass is sandwiched between two bits of rubber. The existing 'o' ring SEA0530 remains the same and provides the main seal the SEA1774 helps cushion the glass against the sight glass retainer, The AM400SGR (ISSUE E) has had its counter bore increased to take the new seal so can not be used without SEA1774.
